# Essentials Bifold Doors Range

Bespoke Aluminium Bi-fold Door Systems

A European designed system offering above ground bottom running with multiple threshold options. The hardware and system are bespoke designed to give maximum carry capacity, whilst offering slim sightlines, oversized doors and minimum profiles.

The system is easily installed, the doors can open in or out using the same profiles, the sash and outer frame are both the same depth and give excellent thermal values. It is a truly inline system with bespoke hardware resulting in a high performance and very desirable, attractive door.

## Technical Information >
